Parking of vehicles in car parking field

Date	Reviewer
September 2015	Graham Feldwick
February 2017	Ian Harden/Ray Caine

Process: Parking of vehicles in car parking field			
Specific part of process and details: leakage of fuel or oil from vehicles			
Risks Leakage of oils, fuel and other lubricants from vehicles	Risk Owner & deputy Ray Caine PIC for Open Day Designated volunteer for public parking	Risk Rating: L	Control(s): Car parking field is regularly monitored when in use by at least one designated volunteer, who is instructed to be vigilant with regard to any possible leakages from vehicles. Car parking field is used only as a visitor car park and not for vintage vehicles. Car parking field is inspected after all vehicles have departed for any sign of leakage, and also litter. Oil leakage must be reported immediately to the PIC, for appropriate action. The designated oil spill kit must be available in the car park field for use by the parking attendants.
Control Status: Effective			
Risk Assessment Review period: Annual
